

## **Meeting Minutes – 3 March 2025**

**Time :** 12:00AM-1:00PM

**Location :** Sheppard Library

### **Attendees**

<b><u>Role</u></b>	<b><u>Name</u></b>	<b><u>Present</u></b>
Scrum Master	Yug Patel	
Secretary	Noopur Patel	
Developer 1	Atharva Garud	
Developer 2	Dev Patel	
Tester	Mahmudul Saif	

## **1. Agenda**

1. Database schema & SQL script
2. CRUD operations in console menu
3. Synchronizing BST + DB

## **2. Discussion**

1. Reviewed db scripts/createdatabase.sql: tables Appointments and Employees.
2. Planned menu items: Add, Remove, Search, List, Bulk-load, Clear All.
3. On "Add": first insert to DB, then BST; on "Remove": both.

## **3. Decisions**

- Dev2 implements AppointmentDataAccess methods and tests in SSMS.
- Dev1 build Admin/Employee menu skeleton.
- Tester draft DatabaseIntegrationTests.cs.

## **Meeting Minutes – 7 March 2025**

**Time :** 4:00-5:00 PM

**Location :** Sheppard Library

### **Attendees**

<b><u>Role</u></b>	<b><u>Name</u></b>	<b><u>Present</u></b>
Scrum Master	Yug Patel	
Secretary	Noopur Patel	
Developer 1	Atharva Garud	
Developer 2	Dev Patel	
Tester	Mahmudul Saif	

## **1. Review Topics**

1. CRUD menu wiring to DB + BST
2. DatabaseIntegrationTests inserting/removing real records
3. Bulk-load from file skeleton

## **2. Feedback Summary**

- In integration tests: use a sandbox database or wrap in try/finally.
- Bulk-load: skip malformed lines, update nextAppointmentID.
- Menu: add “back” option on each prompt to cancel.

## **3. Agreed Changes**

- Dev1 add AskOrBack() helper.
- Dev2 finish file parser and FileIntegrationTests.cs.
